

SCOPBYS VIDEOCONFERENCING SOLUTION ADDS OUTSTANDING VALUE TO THE SCOPTEL IPBX EXPERIENCE

In a world where remote working and online collaboration are becoming increasingly common, it is essential to have reliable and efficient tools. SCOPBYS is a video conferencing solution designed to provide an optimal communication experience that complements SCOPTEL.

KEY FEATURES :

Optimal video and audio quality :

SCOPBYS ensures exceptional video and audio quality during videoconferences, providing smooth and uninterrupted communication with capacity for up to 50 participants.

Accessories :

SCOPBYS comes fully integrated with screen sharing, handheld, integrated chat and social network broadcasting.

Security and Privacy :

Data security is our priority. SCOPBYS uses advanced encryption protocols to protect conversations and information.

Accessibility and Ease of Use :

SCOPBYS is designed to be intuitive and accessible to everyone, with no installation required. Simply share the videoconferencing link to invite participants.

Cross-platform compatibility :

SCOPBYS is compatible with all major browsers and operating systems, allowing online meetings to be held from a computer, tablet, or iOS or Android phone.
