

DID YOU KNOW?

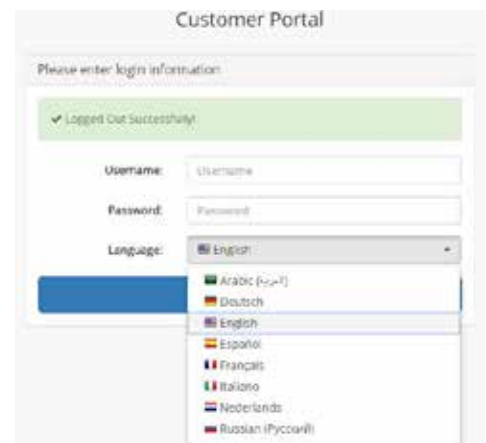

Learn about ScopTEL features. Because Communication Matters!

Web Portal

Web portal is a new option available with ScopTEL. Lots of telephony features are now available, just a few clics away! Anywhere, anytime!

Functionnalities

- Voicemail management
- Follow me
- Programmable keys
- Access call lists (incoming, outgoing, missed, etc.)
- Customized call forward
- Priority calls

Advantages

- Web-based virtual desktop, type in your PBX URL (ex.: <http://pbx.yourpbx.com>)
- Accessible at all time
- Available in 8 languages
- Dashboard with a simple and user-friendly graphical interface

Procedure

Interested in this option? Here's how to get it.

- Purchase the CLIENT WEB PORTAL option.
- Update ScopTEL and install the «webclient» package.
- Go to the GUI (5555) and go to the Server module -> Configuration and configure the Web Client port (default is 8080).
- Go to Web Portal (8080 or other port) and connect with the user / pass «admin» and change the password.
- Enable one or more extensions with the WebGUI (in ScopTEL) and test the connections and functionality over the Web Portal (8080 or other port).
- Use the 'admin' section of the Web Portal to configure several PBX servers on the same interface.
