Montreal --- Toronto --- Paris --- Johannesburg

COMPETITIVE SOLUTION FOR ENTERPRISES AND INTEGRATORS

Hardware

Very low heat dissipation, power consumption similar to that of a light bulb, and no noise.

ScopBOX is based on the latest Intel mini barebone called NUC, the «Next Unit of Computing». Packed with Power! Its performance has no relation to its size. Although only 3.9 cm high with a base of 11.2 cm, it includes, depending on the number of phones to manage:

- » 1x Intel Core i3 3217U 1,8 GHz Dual Core CPU
- » HyperThreading mode (4 Threads)
- » From 4 to 16 GB of RAM SO-DIMM DDR3 (1066/1333/1600 MHz)
- » 1x NIC 10/100/1000 Mb/s
- » From 32 to 256 GB Solid State Drive (SSD)
- » 3x USB 2.0 ports
- » 2x HDMI ports
- » 1x 65 Watts AC adaptor
- » 3 year standard ScopBOX warranty.

Software

No compromise on features.

The ScopBOX is preloaded with LITE or PRO version of ScopTEL, the highly regarded IP telephony and Unified Communications software. Available in 10, 25 and 50 license increments, each user can enjoy all of the bundled features of the purchased version :

- » Advanced telephony features
- » Unified Voice Mail
- » Fax server*
- » Audio conference bridge
- » Advanced IVR
- » Advanced ACD*
- » Click-to-Call
- » Call by name
- » Advanced Professional Reporting Systems*
- » Integrated billing*
- » Real time web management interface, supervision for operators, users and administrators
- » Multi tenant environment*

Integration

You order, we set it up for you.

Because you do not have the resources or simply because you prefer a managed solution, we can prepare and integrate everything for you.

Upon purchasing a ScopBOX, a Request for Information (RFI) document will be provided in order to establish in detail your functional requirements, and meet the specific characteristics of the concerned installation.

Besides the ScopTEL IP PBX software integration within the ScopBOX, the provided integration includes: General settings, network settings, creating facilities (Class of Service), extensions, trunks, outgoing/incoming lines, the provisioning of devices the group settings, functional testing and general validation. A full backup is performed prior to shipping and then...

Last task standing... deploy and work!!!

Maintenance

Well maintained Customer = Satisfied Customer

Customer loyalty is directly related to ongoing support and periodic system maintenance. Also, in order to deliver on this point, we have established an outstanding support and maintenance plan for your ScopBOX installations:

- » Standard 3 year level 2 local ScopTEL support access: Monday to Friday from 9am to 6pm,
- » Provision for minor and major versions of ScopTEL for 3 years,
- » In case of hardware failure, early replacement exchange server with a model at least equivalent, reloaded with the last provided backup.

Backups can be configured on an automated schedule and routinely uploaded to ScopServ to reduce downtime in the event of system failure.

SYSTEM BUILT AND CONFIGURED Includes 3 Years of Software Maintenance**

LITE or PRO Versions based on optional features!!!

**The 3 year maintenance is a built package. Annual maintenance is available per year at the customer's discretion.

About ScopServ

ScopServ International inc is a Montreal based Canadian company and is the creator of ScopTEL IP PBX, the most complete and comprehensive Voice over Internet Protocol based platform available on the market.
