

SCOPBOX™

UNIFIED COMMUNICATION CONCENTRATE

HARDWARE and SOFTWARE all in one!

Very low heat dissipation, power consumption similar to that of a light bulb, and no noise.

SCOPBOX is based on the latest Intel mini barebone called NUC, the "Next Unit of Computing".

Packed with Power! Its performance has no relation to its size. Although only 3.9 cm high with a base of 11.2 cm, it includes, depending on the number of phones to manage:

- 1x Intel Core i3 3217U 1,8 GHz Dual Core CPU
- HyperThreading mode (4 Threads)
- From 4 to 16 GB of RAM SO-DIMM DDR3 (1066/1333/1600 MHz)
- 1x NIC 10/100/1000 Mb/s
- From 32 to 256 GB Solid State Drive (SSD)
- 3x USB 2.0 ports
- 2x HDMI ports
- 1x 65 Watts AC adaptor

PROOF THAT
GREAT THINGS
CAN COME IN
SMALL PACKAGES

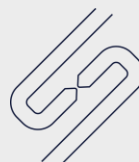

No compromise on features. SCOPBOX is preloaded with LITE or PRO version of SCOPTEL, the highly regarded IP telephony and Unified Communications software.

Available in 10, 25 and 50 license increments, each user can enjoy all of the features.

INTEGRATION

You order, we set it up for you.

Because you do not have the resources or simply because you prefer a managed solution, we can prepare and integrate everything for you.

Upon purchasing a SCOPBOX, a Request for Information (RFI) document will be provided in order to establish in detail your functional requirements, and meet the specific characteristics of the concerned installation.

Besides the SCOPTEL IPBX software integration within the SCOPBOX, the provided integration includes:

- General settings
- Network settings
- Creating facilities (class of Service), Extensions, Trunks, Outgoing/incoming lines
- Provisioning of devices, group settings
- Functional testing and general validation.

A full backup is performed prior to shipping.

MAINTENANCE

Customer loyalty is directly related to ongoing support and periodic system maintenance. Also, in order to deliver on this point, we have established an outstanding support and maintenance plan for your SCOPBOX installations:

- Standard 3-years level 2 local SCOPTEL support
- Regular Business Hour: from Monday to Friday, 8:30am to 4:30pm, Eastern Time.
- Provision for minor and major versions of SCOPTEL for 3 years
- In case of hardware failure, early replacement exchange server with a model at least equivalent, reloaded with the last provided backup
- Backups can be configured on an automated schedule and routinely uploaded to SCOPTEL to reduce downtime in the event of system failure.
